### PowerAim 120 Introduced at NAB 2008 Wins Two Best New Product Awards

### Radio Magazine Announces 2008 PICK HIT Award Recipients

Array Solutions/Kintronic Labs **Power Aim 120** With a Pick Hit Award

Las Vegas - NAB2007 - April 17, 2008 - *Radio* magazine, the Radio Technology Leader published by Penton Media, announced the winners of the Pick Hit Awards for NAB2008. The *Radio* magazine Pick Hits panel selects the top 15 new products introduced at the convention.

The *Radio* magazine Pick Hit Awards recognize the 15 best new radio products shown at the NAB convention. The products are selected by a panel of radio industry professionals and not by the magazine editorial staff. The editorial staff serves only as a moderator during the selection process and does not vote on or nominate any products.

**Significance:** Because the products are chosen at the show by radio professionals, the selected products are indicative of true industry choices. The number of winners is limited to 15 products. There is no favoritism toward any manufacturer or exhibitor. The editorial staff has no influence over the decision process. These are all important elements of the Pick Hits process because, unlike some other trade publication awards given during the show, the products are chosen by the industry, for the industry, without any bias from the magazine. They are also chosen at the show, not in advance.

### Radio World Announces 2008 "Cool Stuff" Award Recipient

LAS VEGAS: Radio World newspaper announced the

recipients of radio's most prestigious technology honor, the Radio World "Cool Stuff" Award, given by a panel of engineering judges at the 2008 NAB Show in Las Vegas.

Array Solutions/Kintronic Labs **Power Aim 120 Vector Impedance Analyzer**

Radio World's "Cool Stuff" Award-winning products, announced by U.S. Editor in Chief Paul J. McLane, were selected by a panel of expert radio broadcast engineers as notable for their design, features, cost efficiency and performance in serving radio broadcast users. The winners will be featured in Radio World, which is read by thousands of broadcast professionals in the United States, around the world and online.

Only a small number of products were chosen for the Radio World "Cool Stuff" Awards from among the hundreds, if not thousands, of new products on display at the convention.
